

## **Task Document: Image to HTML Conversion**

### **Objective:**

Convert the provided images into fully responsive and pixel-perfect HTML pages using modern web technologies.

### **Task Details:**

1. Convert the attached (design1 and design2) both images into HTML/CSS with proper structuring.
2. Ensure that the design is responsive across all screen sizes (desktop, tablet, and mobile).
3. Use clean and maintainable HTML and CSS.
4. Ensure proper font usage and colour consistency as per the design.
5. Maintain cross-browser compatibility (Chrome, Firefox, Edge, Safari).

### **Deliverables:**

- HTML files for each image design.
- CSS files for styling.
- JavaScript files (if required for interactions).
- A responsive design preview.
- Properly structured folder with assets (images, fonts, etc.).

### **Additional Notes:**

- Ensure the HTML structure is semantic and well-commented.
- Avoid inline styles; use external CSS files.
- Optimize images for web performance.
- Ensure smooth hover effects.

**Deadline:** The completed HTML pages should be submitted by **March 29, 2025**.
